“Never Alone”

How Spiritual Ideas Work In Us

*God’s thoughts remind us of our spiritual identity,
show us our potential, and enable us to heal and to be healed.*

**When we feel stuck,
we naturally want answers.**

It would be reassuring to feel supported instead of alone in our efforts to progress.

In this talk, I discuss what I’ve found helpful from my practice of Christian Science healing: a way to experience God as an active presence of good in our lives, and a reliable source of fresh ideas that bring about inspired solutions.
